Routine Food Inspection

BARATH K. BALASUBRAMANIAN
DAIRY QUEEN
6818 W BROWN DEER RD
MILWAUKEE, WI 53223

August 8, 2007

The following list of violations of the Wisconsin Administrative Code as adopted by reference in the Milwaukee Code of Ordinances Chapter 68, and/or other City ordinance(s) must be corrected as soon as possible but not later than the date specified. A re-inspection fee may be assessed if the violation is not corrected by that date. An inspection fee may be charged for any repeat violations.

		Fee Amount:	\$0.00
Code Number	Description of Violation	Correct By	
2-401.11	Observed employee beverages being stored on preparation tables. All employee beverages must be covered with a lid and be consumed using a straw. All employee beverages must also be stored in designated areas away from and below food and food prep areas. Instruct all employees on the proper storage of personal beverages.	08/08/2007	
2-301.15	Observed employees washing hands at the rinse sink at the 4 compartment sinks. Employees may only wash their hands at the two approved hand sinks; the single hand sink on the East kitchen wall, and the far left basin (prewash) of the 4 compartment sink. Instruct employees where to wash hands.	08/08/2007	
6-301.11	No soap available at the hand sink. Supply all handsinks with soap at all times. Monitor and refill immediately when empty.	08/08/2007	
6-301.12	No single use hand towels available at the handsink for drying hands. Provide hand towels at all hand sinks at all times. Monitor and refill immediately when empty.	08/08/2007	
4-501.116	The sanitizer concentration in the sanitizer bucket is too strong. Use test strips to test the concentration and ensure that the concentration of bleach is between 50ppm-100ppm.	08/22/2007

4-501.11 The following items need to be repaired:

08/22/2007

1) The broken slushy tray needs to be repaired so that the surface is smooth and easily cleanable.

2) There is a condensation leak in the walk in cooler. Repair the leak so that water does not drip into the cooler.

3) The Kelvinator freezer has a large amount of ice buildup. The ice is chipping/falling off onto food. Discard the food and defrost the unit. Repair the door gaskets and make any other additional repairs to prevent ice buildup inside the freezer.

4) The walk in freezer has a large amount of ice buildup on the walls and ceiling of the unit. Repair/replace the door gaskets and take appropriate measures to ensure that ice does not build up inside the freezer. This is especially urgent where the outlets are located inside the freezer. Make repairs to ensure that ice does not freeze over the outlet.

5) The floor outside of the walk in freezer is deteriorating and coming apart. Water is also seeping underneath the floor. Repair the flooring area around the walk in freezer and provide base coving at the freezer/floor junction.

4-601.11 The mop sink is filthy. Clean and maintain clean the mop sink. The mop sink must be completely replaced or repaired by the next routine inspection.

08/22/2007

Remove the cardboard and paper on the walk in cooler shelves. The cardboard and paper is not approved for shelf lining and needs to be removed immediately. Ensure that all shelf surfaces are smooth and cleanable.

5-103.11 No cold water available in the restroom. Repair/restore the cold water in the restroom.

08/22/2007

4-901.11 Utensils are being dried on shelves lined with old newspapers. All utensils and equipment must be air dried on a clean, dry, non absorbent surface. Discontinue drying utensils and equipment on newspapers or towels/rags.

08/22/2007

5-202.11 The ice machine in the front lobby area is not properly air gapped. Have a licensed plumber properly install an air gap on the ice machine drain. The end of the drain cannot enter the waste funnel and must be located high enough above the funnel so that sewage or waste does not touch the drain in the case of a backup. This will prevent contamination to the ice in the event of a backup.

08/22/2007

3-301.11 Employees may not touch ready-to-eat food with their bare hands. When preparing burgers, all employees touching the buns and assembling the burgers are required to wear gloves. Instruct all employees to wash hands before wearing gloves and after taking gloves off. Instruct all employees that gloves must be worn at all times when touching food that is "ready to eat" and will no longer need to be cooked.

- | | | |
|----------|---|------------|
| 4-602.11 | The soda nozzles on the soda dispenser unit were dirty/moldy. Clean and sanitize the nozzles daily to prevent mold growth on the inside areas of the nozzle. Ensure that an employee is assigned the task of cleaning and sanitizing the nozzles. | 08/08/2007 |
| 4-301.14 | The waffle cone maker is required to be underneath the hood. Provide an approved equipment stand and move the waffle cone maker so that it is underneath the hood. | 08/22/2007 |

Inspection Notes

Notes: The counter used for cake decorating is not to code. In the event that it deteriorates or there is a change in ownership, the counter will need to be removed. Upon change of ownership, all equipment not to code will be required to be removed from the premise. The "STAR" freezer is missing the lid. The unit is to be replaced by the next routine inspection.

On 8/8/2007, I served these orders upon BARATH K. BALASUBRAMANIAN by leaving this report with
